

Website Resources

If you Google or do a search for breast cancer in your web browser, you could receive over 38 million available sites. Some websites are very sound with accurate information, and some can be very misleading. Please remember that anyone can post a website. There are no regulations enforcing the information posted on the web, some of which can be simply inaccurate.

*These websites are listed for your convenience.
the Alight Foundation is not responsible for their content.*

If you read something that you are not sure of, please ask your doctor or the other medical professionals on your team to verify.
